Creating Peace of Mind in Public Spaces

spinTouch RapidScreen is designed to instill a sense of trust and safety in people across industries as we resume everyday activities, and public gatherings post COVID-19. As we continue to find innovative ways to do our part in flattening the curve, spinTouch non-contact infrared RapidScreen will allow individuals back in stores, schools, and work, in a cost effective, efficient, and safe way.

Developed with the finest German technology in infrared thermopile arrays known as the Heimann sensor, RapidScreen is 100% contactless and frictionless, providing you with the most accurate method to safely read temperatures. Within a matter of seconds, RapidScreen is able to read body temperatures, and alert users if they have a fever.
TOUCHLESS
As people become increasingly conscious and hesitant to touch public surfaces, contactless interaction is among top priorities. RapidScreen system can safely read users temperature from up to 3 feet away.

BEST IN CLASS THERMAL IMAGING SENSOR
Backed by the world’s leading German medical grade technology in infrared thermopile arrays, RapidScreen can capture different levels of infrared light to accurately detect surface body temperature.

HIDE ON SCREEN TEMPERATURE
Since privacy is important to many organizations, the device allows the options to avoid any sign of a medical opinion to be displayed or announced on the device. A pass is announced with: “Thank you, Please Proceed”.

LABOR SAVINGS
By eliminating the need for dedicated personnel, RapidScreen is a cost efficient, and reliable alternative.

INCLUDED
ALL-IN-ONE STAND

Tall Stand (57”)
Adult Height

Medium Stand (47”)
Adult/Child Height

Short Stand (36”)
Child Height

Counter Stand

OPTIONAL ACCESSORIES

Custom Platform Integration

Full Insurance Coverage

Wall Mount Bracket

Stainless Steel Hand Sanitizer Add-on

Heights mentioned include the device.
RapidScreen BASIC / PLUS Models

Developed with the latest innovations in Automated AI Temperature Screening Technology, RapidScreen™ is the fastest and most cost effective way to protect employees and guests while easily complying with current mandates.

THERMAL SENSOR

**BASIC:** Malexis 90621 - Belgium (≤ ± 0.9°F)

**PLUS/PRO:** Heimann HTPA32x32d - German (≤ ± 0.54°F)

Effortlessly reads temperatures in less than 2 seconds from up to 3 feet away

**Real-time email/text alerts** to notify management when a high temperature or no mask is detected.

If **privacy** is a concern, the system has the ability to hide the temperature read out from displaying and logging.

Capable of **identifying staff members** with advanced facial recognition to allow for more **seamless contact tracing** capabilities.

Manage the device **completely offline** or with the optional **internal network software** control all the data on your own servers. Alternatively connect to the **AWS hosted cloud** dashboard.

Prevention is key and it is important to instill a sense of trust and safety as we commence everyday activities, and public gatherings post COVID-19.

The UI and device appearance may differ to what is shown. Thermal sensor specs are based on best case after proper calibration in indoor environment. 
*Requires remote management software. Free version & premium subscription available.
V3 Professional Series

Designed for organizations that demand the most advanced features available, the RapidScreen™ V3 PRO makes your screening process more scalable and future proof.

ONLY AVAILABLE ON V3 PRO SERIES

Includes all of the capabilities and features of the RapidScreen v3 Standard model, plus the following advanced features:

- **Access Control**: Able to be connected with automatic doors and security systems, and deny access to people who have a fever.
- **HID RFID**: Can be equipped with the most common *RFID/HID readers to allow for an alternative to facial recognition.
- **Ticketing Printer**: Supports onsite USB printing for both receipt roll & label sticker options. Provides sequential queue number with each print.

- **API Integrations**: The ability to integrate your device with almost any open platform using the provided Rest API.
- **Easy Touchscreen Setup**: Touch screen allows for an effortless setup. Also future proofs your device for functionality beyond temperature screening.
- **2-Year Warranty & Support**: Extra piece of mind coverage included, providing a total of 2 years of warranty + email & phone support.

*Does not support all RFID/HID/NFC/MiFare frequencies and brands. Will require advance notice and testing to confirm compatibility and installation prior to ship out.
RapidScreen +

The latest innovation in Thermal Screening Systems, RapidScreen will keep your employees and customers safe while stopping the spread of viruses such as COVID-19.

Why RapidScreen is considered the leader

The most advanced thermal screening System on the market with all inclusive features! Learn more on why this solution beats the competition in every category.

WORLD LEADING THERMAL IMAGING TECHNOLOGY
Can recognize and capture different levels of infrared lights to accurately and rapidly detect temperatures of users within three feet of the RapidScreen. The system allows for both automatic and manual calibration for the most accurate temperature readings.

FEVER ALARM
An alarm will sound, notifying users if their temperature reading exceeds 100.4°F Fahrenheit or 37.8°C Celsius to alert the user that they have a fever. The alarm threshold can be easily adjusted.

WORKS WITH PROTECTIVE MASKS
Using the most cutting-edge technology, the advanced 3D cameras have the capabilities still detect and read temperature of users wearing protective masks. Optional feature can remind guests to wear their mask if they are scanned without one.

EMAIL/TEXT/SLACK NOTIFICATION ALERT
Receive real time notifications if a person is detected to have high temperature, no mask or a detection of a stranger. An email will immediately be sent out with the location information, time stamp, temperature reading and captured image.

STANDALONE OFFLINE MODE
Take the unit out of the box and all you need is a power outlet to start scanning people. It's simple and fast to make quick changes to the settings with the included mouse. No internet connection needed!

ONLINE REMOTE MANAGEMENT
For users that need the ability to manage either a single device or multiple devices remotely, we offer the companion application. This advanced software can run on your network or can be offered via aws cloud and allow your team to access any device as if you’re directly in front of it, in addition to providing up to the minute key analytics and time logging.

ACCESS CONTROL AND FULL CONNECTIVITY
Able to be connected with automatic doors, security systems, payroll or ticketing printers to restrict entry access to people who have a fever. Uses standard connections such as relays, wiegand, USB, WiFi and ethernet.

OPTION FOR FACIAL RECOGNITION
RapidScreen can be programmed to include facial recognition to capture employees to allow for more seamless contact tracing capabilities.

HID Security RFID CARD READER
Fully equipped with the most common RFID hardware to allow for an alternative to facial recognition. You now have the ability to connect existing systems with RapidScreen for a more fluid integration.

FUTURE PROOFING & SOFTWARE UPDATES
With our background in custom software development, we are already at work on creating more advanced integrations and features. These updates will be available on an ongoing basis for all RapidScreen clients.

PRODUCT WARRANTY
US 1 to 2 year manufacturer warranty and support, via phone/email. Optional extended warranty is available.

---

1 Will require remote management software.
2 Both free version and subscription service available, contact your sales representative for more information.
3 May require custom api integration.
