Creating Peace of Mind in Public Spaces

spinTouch RapidScreen is designed to instill a sense of trust and safety in people across industries as we resume everyday activities, and public gatherings post COVID-19. As we continue to find innovative ways to do our part in flattening the curve, spinTouch non-contact infrared RapidScreen will allow individuals back in stores, schools, and work, in a cost effective, efficient, and safe way.

Developed with the finest Belgium technology in infrared thermopile arrays known as the Melexis sensor, RapidScreen is 100% contactless and frictionless, providing you with the most accurate method to safely read temperatures. Within a matter of seconds, RapidScreen is able to read body temperatures, and alert users if they have a fever.
As people become increasingly conscious and hesitant to touch public surfaces, contactless interaction is among top priorities. RapidScreen system can safely read users' temperature from up to 3 feet away.

A frictionless interaction, RapidScreen enables users to have their temperatures read in a matter of 2 seconds, ensuring a steady & safe flow of traffic into public spaces.

Backed by the world's leading technology in infrared thermopile arrays, RapidScreen can capture different levels of infrared light to accurately detect temperature.

By eliminating the need for dedicated personnel, RapidScreen is a cost efficient, and reliable alternative.

Open Your Business Safely.

Developed with the latest innovations in Automated AI Temperature Screening Technology, RapidScreen™ is the fastest and most cost effective way to protect employees and guests while easily complying with current mandates.

Effortlessly reads temperatures in less than 2 seconds from up to 3 feet away

Intuitive user interface allows for quick changes to settings and setup without the need for internet access.

High accuracy thermal sensor, with a low temperature tolerance and adjustable high temp threshold.

Real-time email/text alerts to notify management when a high temperature or no mask is detected

Optional online dashboard allows for remote access and monitoring capabilities*

Advanced features: security access control, built-in HID RFID card reader, facial recognition, recorded log tracing, API integrations*, and much more.

Prevention is key and it is important to instill a sense of trust and safety as we commence everyday activities, and public gatherings post COVID-19.

*Requires remote management software. Both free version & premium subscription option available.
WORLD LEADING THERMAL IMAGING TECHNOLOGY
Can recognize and capture different levels of infrared lights to accurately and rapidly detect temperatures of users within three feet of the RapidScreen. The system allows for both automatic and manual calibration for the most accurate temperature readings.

FEVER ALARM
An alarm will sound, notifying users if their temperature reading exceeds 100.4° Fahrenheit or 37.8° Celsius to alert the user that they have a fever. The alarm threshold can be easily adjusted.

WORKS WITH PROTECTIVE MASKS
Using the most cutting-edge technology, the advanced 3D cameras have the capabilities to still detect and read temperature of users wearing protective masks. Optional feature can remind guests to wear their mask if they are scanned without one.

EMAIL/TEXT NOTIFICATION ALERT
Receive real time notifications if a person is detected to have high temperature, no mask or a detection of a stranger. An email will immediately be sent out with the location information, time stamp, temperature reading and captured image.

STANDALONE OFFLINE MODE
Take the unit out of the box and all you need is a power outlet to start scanning people. It’s simple and fast to make quick changes to the settings with the included mouse. No internet connection needed!

ONLINE REMOTE MANAGEMENT
For users that need the ability to manage either a single device or multiple devices remotely, we offer the companion application, Smart Pass. This advanced software can run on your network and allow your team to access any device as if you’re directly in front of it, in addition to providing up to the minute key analytics and time logging. WATCH VIDEO

ACCESS CONTROL AND FULL CONNECTIVITY
Able to be connected with automatic doors, security systems, payroll or ticketing printers to restrict entry access to people who have a fever. Uses standard connections such as relays, wiegand, USB, WiFi and ethernet.

OPTION FOR FACIAL RECOGNITION
RapidScreen can be programmed to include facial recognition to capture employees to allow for more seamless contact tracing capabilities.

HID Security RFID CARD READER
Fully equipped with the most common RFID hardware to allow for an alternative to facial recognition. You now have the ability to connect existing systems with RapidScreen for a more fluid integration.

FUTURE PROOFING & SOFTWARE UPDATES
With our background in custom software development, we are already at work on creating more advanced integrations and features. These updates will be available on an ongoing basis for all RapidScreen clients.

PRODUCT WARRANTY
US 1-year manufacturer warranty and support, via phone/email. Optional extended warranty is available.

1 Will require remote access software.
2 Both free version and subscription service available, contact your sales representative for more information.
3 May require custom api integration.
RapidScreen is the most advanced Thermal Screening System on the market with all inclusive features and more!

Remote Management Software
Utilize our exclusive platform to effortlessly manage your devices in one place! Available for internal network or cloud based option.

RapidScreen +
The latest innovation in Thermal Screening Systems, RapidScreen will keep your employees and customers safe while stopping the spread of viruses such as COVID-19.

## SYSTEM
- **CPU**: RK3288 Quad-Core
- **RAM / Internal Memory**: 2GB / EMMC 8G
- **Operation System**: Android 7.1.2

## DISPLAY
- **Panel Size**: 8" LCD IPS Panel
- **Resolution / Aspect Ratio**: 800 x 1280 High Definition / 16:10
- **Contrast Ratio / Brightness**: 1000:1 / 250cd/M

## NETWORK
- **WiFi**: 802.11b/g/n 2.4G
- **Bluetooth**: Bluetooth 4.1
- **Cellular**: Optional accessory

## INTERFACE
- **USB**: 1 USB OTG, 1 USB HOST Standard A Port
- **Wired Connection**: RJ45 ethernet port, Wiegand 26/36 input/output, Relay Control, UBOOT, RS232 Serial Port
- **Card Reader**: MiFare NFC / HID proximity card reader

## SENSOR
- **Infrared Thermal Image Detection**: Melexis MLX92621
- **Measurement Distance**: Up to 3 feet
- **Temperature Accuracy**: ≤ ± 0.5°C factory / ≤ ± 0.3°C typical result with manual calibration
- **Temperature Range Detection**: 28°C / 82.4°F to 43°C / 109.4°F

## SOFTWARE
- **Features**: Facial Recognition, Mask Detection, 1:1 Face Comparison
- **Camera Resolution / Aperture**: 2 million Pixels / F2.4
- **Abnormal Temperature Alarm**: Temperature alarm value can be custom configured

## POWER
- **Overall Power Consumption**: Below 13.5 W
- **Power Requirements**: Input: 100–240VAC, 50/60Hz, 1.5 A          Output: 12V — 5A
